

Cradle -to- Grave FOG Tracking

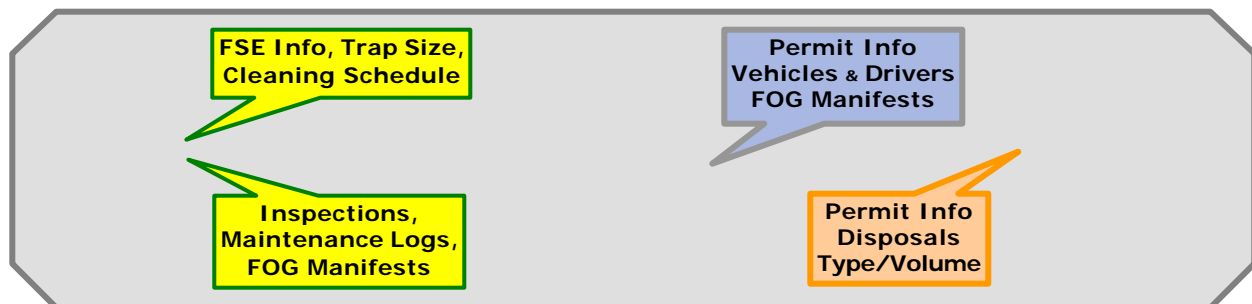

In leading FOG programs across the US, FOG managers are not only charged with managing proper grease trap maintenance, but also making sure that the FOG pumped from traps is disposed of properly.

- The *newly released* **LinkoFOG™ V9** provides comprehensive Cradle-to-Grave tracking for **Food Service Establishments, Liquid Waste Haulers** and **FOG Disposal Facilities**.

- **FSE Tracking** - Management of your ever-changing list of FSEs, owners, grease traps, interceptors and AGRUs is a snap using LinkoFOG™.
- **FOG Haulers** - Manage Liquid Waste Haulers, their vehicles, drivers and permit dates.

LinkoFOG™ V9 puts you in the *driver's seat* for managing **Maintenance Schedules, Inspections, FOG Manifests, Enforcements, and FOG Disposals**. Quickly identify which FSE are not properly maintaining their traps, which Haulers are moving the most FOG, exactly how much FOG is being disposed of at each Disposal Site.

- LinkoFOG™ is the most flexible FOG software available, it is easily configured to accommodate your program's specific requirements.
- Whether you are tracking maintenance at the FSE level or using the Hauler's Manifests or tracking FSE compliance with manifests from the Disposal Site, LinkoFOG will help you quickly and easily manage FOG compliance.

Contact Linko today to find out more about the new LinkoFOG™ version 9 and start tracking all of your FOG from **Cradle -to- Grave** !
