

LinkoCTS/LinkoFOG

System Requirements, SQL Express Edition

WORKSTATIONS*

Operating System** Both 32bit and 64bit	Windows XP SP-3 or later Windows Vista SP-2 or later	Windows 7
MS Office Software**	Microsoft Access, Word and Excel Most recent service releases of 2003, 2007, 2010 (32 bit***)	
Processor	Minimum: 1 GHz processor Recommended: 2 GHz processor or higher	
Memory	Minimum: 1 GB of RAM Recommended: 2 GB of RAM or more	
Hard Disk	Minimum: 250 MB of free disk space Recommended: 30% free disk space on Operating System drive or more	
Other	Keyboard, mouse, color monitor with 1024x768 resolution CD-ROM drive Minimum: Internet access Recommended: High speed Internet access	

SERVER

Database and File Server	The machine where the Linko named instance of SQL Server Express 2008 and shared files will be installed. When Linko is installed on multiple workstations, SQL Express is installed on only one machine that all users have access to via a network.	
Operating System** Both 32bit and 64bit	Windows XP SP-3 or later Windows Vista SP-2 or later Windows 7	Windows Server 2003 SP-2 or later Windows Server 2008 Windows Server 2008 R2
Processor	Minimum: 2 GHz processor Recommended: 3 GHz processor or faster	
Memory	Minimum: 2 GB of RAM Recommended: 3 GB of RAM or more	
Hard Disk	Minimum: 500 MB of free disk space Recommended: 30% free disk space on Operating System drive or more (This amount will increase over time as data is added.)	

Linko Software can also be run on terminal services including CITRIX systems.

Linko Software supports two installation configurations:

Client/Server: where one or more machines will have the Workstation software installed but the database will reside on a single Server machine that is accessible by all Workstations via a network.

Stand Alone: where one machine serves as both the Workstation and Server. That is, the software and the database exist on one machine only. This configuration should only be used when no more than one person needs access to the software.

* Minimum is based on the oldest supported versions of MS Office as published on the Microsoft website. In most cases your needs will exceed these minimum requirements due to other software or operating system requirements. Visit <http://support.microsoft.com> and search for Office System Requirements.

Recommended is based on the typical demands placed on a PC or laptop to run a variety of software services and applications simultaneously and still provide above average performance of the Linko software. In general, faster processor speeds and larger RAM result in better performance.

** Linko Technical support is provided for the most recent service releases of the noted Microsoft office products.

*** In a default installation of Office 2010, the 32-bit version is installed, even on 64-bit systems. To use Linko Software on 64-bit Office 2010, use the 32-bit default installation.
